

Logging into OKTA Using a YubiKey on macOS

Logging into OKTA Using a YubiKey on macOS

1. **Receive OKTA Invite Email:**
 - Open the invite email from OKTA in your inbox.
 - Click on the activation link provided in the email to begin the setup process.
 2. **Set Up Your OKTA Account:**
 - Follow the prompts to set up your OKTA account, including creating a password and setting up security questions.
 3. **Install YubiKey Manager:**
 - Go to the [Yubico website](#).
 - Download the YubiKey Manager for macOS. <https://developers.yubico.com/yubikey-manager-qt/Releases/yubikey-manager-qt-latest-mac.pkg>
 - Open the downloaded file and follow the installation instructions to complete the setup.
 4. **Insert Your YubiKey:**
 - Insert your YubiKey into a USB port on your macOS computer.
 5. **Configure YubiKey:**
 - Open the YubiKey Manager application.
 - Follow the on-screen instructions to configure your YubiKey. This may include setting a PIN and registering the YubiKey with your OKTA account.
 6. **Log into OKTA:**
 - Open your web browser and navigate to your organization's OKTA login page.
 - Enter your username and password, then click "Sign In".
 7. **Use YubiKey for Authentication:**
 - When prompted for multifactor authentication, select the YubiKey option.
 - Touch the gold contact on your YubiKey when it starts flashing to complete the authentication process.
 8. **Access Your OKTA Dashboard:**
 - Once authenticated, you will be redirected to your OKTA dashboard where you can access your applications and services.
-
